Create Multi-Bootable CD/DVD image file

You are here: Tutorials > Create Multi-Bootable CD/DVD image file

MagicISO has ability to create Multi-Bootable CD/DVD image file so that the user can incorporate multiple installation CD into one CD/DVD, and install multiple Operation System from one CD/DVD.

After you click menu item "Tools"->"Make Multi-Boot Image", Multi-Boot Image Editor will be shown.

The Operations of Multiple Bootable image Editor

- Preview: Preview the bootable CD menu. Click here to view the samples.
- New: Create new Multiple Bootable image file.
- Open: Open the exist Multiple Bootable Image file.
- Save: Save the current Multiple Bootable Image file.
- Save as: Save the current Multiple Bootable image file as new files.
- Apply: Apply the Multiple Bootable image file to the current opened CD/DVD image files.
- Close: close the Multiple Bootable image editor

Boot Items

- Add: Click this button to add a bootable item to Multiple Bootable image file.
  "Bootable Wizard" will be shown after clicking this button.
- Delete: Delete the selected bootable item.
- Edit: Edit the selected bootable item.
  "Bootable Wizard" will be shown after clicking this button.
- Move Up: Move up the selected bootable item.
- Move Down: Move down the selected bootable item.
- Set Default: Set the selected bootable item to default bootable item.
  Default bootable item will be active after the time waiting for pressing key is timeout.

Information

- Information: The information will be shown on the header of the Multiple bootable CD menu.

Help

- Help: will be shown when the user press F1 key

Option

- Waiting for: if you check this option. The system will boot from the default bootable item after the time waiting for pressing key is timeout.
